Forward-looking statements are characterized by the use of forward-looking terminology such as "will," "expects," "anticipates," "continue," "believes," "should," "intended," "guidance," "preliminary," "future," "planned," or other words. These forward-looking statements include, but are not limited to, statements relating to the Company's objectives, plans and strategies, statements of preliminary or projected results of operations or of financial condition and all statements that address activities, events, or developments that the Company intends, expects, projects, believes or anticipates will or may occur in the future. Important factors that could cause actual results, developments and business decisions to differ materially from those anticipated in these forward-looking statements include, among other things: the Company's degree of success in developing, introducing and selling new or improved products and product enhancements including specifically the Company's Poly Pro and Presto products; the extent of the Company's ability to consummate sales to large accounts with multi-system delivery plans; the degree of the Company's ability to fill orders for Kornit's systems; the extent

of the Company's ability to continue to increase sales of Kornit's systems, ink and consumables; the extent of the Company's ability to leverage Kornit's global infrastructure build-out; the development of the market for digital textile printing; the availability of alternative ink; competition; sales concentration; changes to the Company's relationships with suppliers; the extent of the Company's success in marketing; the duration and severity of, and the degree of recovery from, the global COVID-19 pandemic, which could potentially impact once again, in a material adverse manner, the Company's operations, financial position and cash flows, and those of the Company's customers and suppliers; and those additional factors referred to under "Risk Factors" in Item 3.D of the Company's Annual Report on Form 20-F for the year ended December 31, 2020, filed with the U.S. Securities and Exchange Commission, or SEC, on March 25, 2021, and to be described in Item 3.D of the Company's Annual Report on Form 20-F for the year ended December 31, 2021, which is expected to be filed with the SEC in March 2022. The presentation of non-GAAP financial information is not meant to be considered in isolation or as a substitute for the directly comparable financial measures prepared in accordance with GAAP. Kornit urges investors to review the reconciliation of non-GAAP financial measures to the comparable GAAP financial measures included below, and not to rely on any single financial measures to evaluate its business. A reconciliation for non-GAAP operating income guidance set forth above is not provided because, as forward-looking statements, such reconciliation is not available without unreasonable effort due to the high variability, complexity, and difficulty of estimating certain items such as charges to share-based compensation expense and currency fluctuations which could have an impact on its consolidated results. Kornit believes the information provided is useful to investors because it can be considered in the context of Kornit's historical disclosures of this measure.

Non-GAAP Discussion Disclosure

Non-GAAP financial measures consist of GAAP financial measures adjusted to exclude the impact of share-based compensation expenses, acquisition related expenses, foreign exchange differences associated with ASC 842, amortization of acquired intangible assets, and the related tax effect of the foregoing. The purpose of such adjustments is to provide an indication of the Company's performance exclusive of non-cash charges and other items that are considered by management to be outside of the Company's core operating results. These non-GAAP measures are among the primary factors management uses in planning for and forecasting future periods. Furthermore, the non-GAAP measures are regularly used internally to understand, manage, and evaluate the Company's business and make operating decisions, and the Company believes that they are useful to investors as a consistent and comparable measure of the ongoing performance of the Company's business. However, the Company's non-GAAP financial measures are not meant to be considered in isolation or as a substitute for comparable GAAP measures and should be read only in conjunction with the Company's consolidated financial statements prepared in accordance with GAAP. Additionally, these non-GAAP financial measures may differ materially from the non-GAAP financial measures used by other companies.
